GOOGLE BUSINESS PROFILE / ONE-PAGE AUDIT EXAMPLE

Sample & Sons Plumbing

Fictional local service business · Example audit, not a live listing.

The observations below are an illustrative scenario. No Google profile, rating, review count or ranking claim is being represented as real.

Fix first

01 Make the opening hours agree

Sample observation: The profile shows Saturday as closed; the business website shows morning hours.

Action: Confirm the real hours, then update both places. Add special hours for closures and holidays.

02 Explain which jobs you take

Sample observation: The description is blank and the service list does not name the core plumbing services.

Action: Add a plain-language description and the services actually offered. Leave out unsupported claims.

03 Use current, recognizable photos

Sample observation: The gallery does not show the current business exterior or marked service vehicle.

Action: Add recent photos owned by the business. Do not present stock photos as the premises or team.

What a real audit includes

Public source links beside the observations, checked business details, and a short order of fixes. No account password needed.

Pinwick is not affiliated with Google. An audit does not promise rankings or customers.
